DIRECTIVES

DIRECTIVE (EU) 2018/597 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 18 April 2018
Newcastle disease
(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 43(2) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee (1),

Acting in accordance with the ordinary legislative procedure (2),

Whereas:

(1) Council Directive 92/66/EEC (3) lays down the Union control measures to be taken in the event of an outbreak of
Newcastle disease in poultry, racing pigeons and other birds kept in captivity.

(2) Article 15 of Directive 92/66/EEC provides that the European Union reference laboratory for Newcastle disease is
referred to in Annex V to that Directive. Annex V to that Directive duly refers to that laboratory and lists its
functions and duties.

(3) Article 19 of Directive 92/66/EEC lays down control measures to be taken by Member States in the event that
carrier pigeons or birds kept in captivity are suspected of being infected with Newcastle disease. It provides that,
to the extent required for the proper application of those control measures, Member States are to furnish the
Commission with information on the disease situation and the control measures applied in accordance with the
model form set out in Annex VI to that Directive.

(4) Article 21 of Directive 92/66/EEC provides that each Member State is to draw up a contingency plan, specifying
the national measures to be implemented in the event of an outbreak of Newcastle disease. It provides that the
criteria to be applied for drawing up that plan are set out in Annex VII to that Directive.

(5) Article 24 of Directive 92/66/EEC provides that the Annexes thereto are to be amended, as and when required,
by the Council acting by a qualified majority on a proposal from the Commission, in particular to take into
account developments in research and in diagnostic procedures.

(6) Annexes V, VI and VII to Directive 92/66/EEC set out respectively: (i) the name and address of the European
Union reference laboratory for Newcastle disease as well as its functions and duties; (ii) the model form to be
used by Member States in order to report on the disease situation and the control measures applied; and (iii) the
minimum criteria to be applied by Member States for drawing up contingency plans specifying the national
measures to be implemented in the event of an outbreak of Newcastle disease.

(2) Position of the European Parliament of 14 March 2018 (not yet published in the Official Journal) and decision of the Council of 12 April
2018.
In order to simplify and streamline the procedures regarding the control of Newcastle disease, in particular taking into account the new rules in relation to the designation of European Union reference laboratories provided for by Article 93 of Regulation (EU) 2017/625 of the European Parliament and of the Council (1), as well as the new system of implementing acts provided for in Article 291 of the Treaty on the Functioning of the European Union, and to ensure uniform conditions for the implementation of Directive 92/66/EEC, Annexes V, VI and VII to Directive 92/66/EEC should be deleted and implementing powers in the fields covered by those Annexes should be conferred on the Commission. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council (2).

For reasons of clarity, the functions and duties of the European Union reference laboratory for Newcastle disease should be laid down in Article 15 of Directive 92/66/EEC, and the criteria for the contingency plans should be laid down in Article 21 of that Directive.

For reasons of consistency and efficiency, Member States should ensure timely transposition of the provisions of this Directive.

Directive 92/66/EEC should therefore be amended accordingly.

HAVE ADOPTED THIS DIRECTIVE:

Article 1

Amendments to Directive 92/66/EEC

Directive 92/66/EEC is amended as follows:

(1) Article 15 is replaced by the following:

‘Article 15

1. The Commission shall, by means of implementing acts, designate a European Union reference laboratory for Newcastle disease. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 25.

2. The functions and duties of the European Union reference laboratory for Newcastle disease shall be:

(a) to coordinate, in consultation with the Commission, the methods employed in the Member States for diagnosing Newcastle disease, specifically by:

(i) typing, storing and supplying strains of Newcastle disease virus for serological tests and the preparation of antisera;

(ii) supplying standard sera and other reference reagents to the national reference laboratories in order to standardise the tests and reagents used in the Member States;

(iii) building up and retaining a collection of Newcastle disease virus strains and isolates;

(iv) organising periodical comparative tests of diagnostic procedures at Union level;

(v) collecting and collating data and information on the methods of diagnosis used and the results of tests carried out in the Union;

(vi) characterising isolates of Newcastle disease viruses by the most up-to-date methods available to promote a greater understanding of the epidemiology of Newcastle disease;

(vii) keeping abreast of developments in Newcastle disease surveillance, epidemiology and prevention throughout the world;

(viii) retaining expertise on Newcastle disease virus and other pertinent viruses to enable a rapid differential diagnosis;

(ix) acquiring a thorough knowledge of the preparation and use of the products of veterinary immunology used to eradicate and control Newcastle disease;

(b) to actively assist in the diagnosis of outbreaks of Newcastle disease in Member States by receiving virus isolates for confirmatory diagnosis, characterisation and epidemiology studies;

(c) to facilitate the training or retraining of experts in laboratory diagnosis with a view to the harmonisation of techniques throughout the Union;

(2) Article 19 is amended as follows:

(a) paragraph 5 is replaced by the following:

‘5. To the extent that it is required for the proper application of the measures laid down in this Article, the Member States shall submit to the Commission, within the framework of the Standing Committee on Plants, Animals, Food and Feed, information on the disease situation and the control measures applied.’

(b) the following paragraph is added:

‘6. The Commission may, by means of implementing acts, lay down rules regarding the information to be submitted by the Member States to the Commission as provided for in paragraph 5 of this Article. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 25.’

(3) Article 21 is replaced by the following:

‘Article 21

1. Each Member State shall draw up a contingency plan, specifying the national measures to be implemented in the event of an outbreak of Newcastle disease. The contingency plan shall be updated, as appropriate, to take account of developments in the situation.

The contingency plan shall allow access to facilities, equipment, personnel and all other appropriate materials necessary for the rapid and efficient eradication of the outbreak of Newcastle disease. It shall give a precise indication of the vaccine requirements which each Member State deems necessary for emergency vaccination.

2. The contingency plans and any updates thereto shall be submitted to the Commission.

3. The Commission shall examine the contingency plans and any updates thereto in order to determine whether they permit the desired objective to be attained and shall suggest to the Member State concerned any amendments required in particular to ensure that they are compatible with those of the other Member States.

The Commission shall approve the contingency plans and any updates thereto, if necessary amended, in accordance with the examination procedure referred to in Article 25.

4. The Commission may, by means of implementing acts, lay down criteria to be applied by Member States for drawing up the contingency plans. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 25.’

(4) Article 25 is replaced by the following:

‘Article 25

2. Where reference is made to this Article, Article 5 of Regulation (EU) No 182/2011 shall apply.

(5) Annexes V, VI and VII are deleted.

**Article 2**

Transposition

By 30 June 2018, Member States shall adopt and publish the measures necessary to comply with this Directive. They shall immediately inform the Commission thereof.

They shall apply those measures from 1 January 2019.

When Member States adopt those measures, they shall contain a reference to this Directive or shall be accompanied by such reference on the occasion of their official publication. The methods of making such reference shall be laid down by Member States.

**Article 3**

Transitional provision

The designation of the European Union reference laboratory for Newcastle disease referred to in Annex V to Directive 92/66/EEC, before the amendments made by this Directive, shall remain effective until a European Union reference laboratory for Newcastle disease has been duly designated in accordance with Article 15 of Directive 92/66/EEC, as amended by this Directive.

**Article 4**

Entry into force

This Directive shall enter into force on the day following that of its publication in the Official Journal of the European Union.

**Article 5**

Addressees

This Directive is addressed to the Member States.

Done at Strasbourg, 18 April 2018.
