**of 22 October 2001**  
**amending Regulation (EC) No 1622/2000 as regards the use of lysozyme in wine products**

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 1493/1999 of 17 May 1999 on the common organisation of the market in wine <sup>(1)</sup>, as last amended by Regulation (EC) No 2826/2000 <sup>(2)</sup>, and in particular Article 46 thereof,

Whereas

- (1) Annex IV to Regulation (EC) No 1493/1999 permits the addition of lysozyme to the wine products concerned.
- (2) Commission Regulation (EC) No 1622/2000 of 24 July 2000 laying down certain detailed rules for implementing Regulation (EC) No 1493/1999 on the common organisation of the market in wine and establishing a Community code of oenological practices and processes <sup>(3)</sup>, as last amended by Regulation (EC) No 1655/2001 <sup>(4)</sup>, lays down, in particular, restrictions and requirements pertaining to the use of certain substances authorised by Regulation (EC) No 1493/1999. The maximum permissible doses of those substances are fixed in Annex IV.
- (3) Experiments concerning the use of lysozyme in wine-making carried out by two Member States have shown that the addition of this substance is of significant benefit for the stabilisation of wines and permits the production of quality wines with a reduced sulphur dioxide content. Its use should therefore be permitted and maximum doses laid down in line with the technological requirements revealed in the experiments.
- (4) Regulation (EC) No 1622/2000 should therefore be amended accordingly to permit the use of lysozyme fulfilling the purity criteria laid down by Commission Directive 96/77/EC of 2 December 1996 laying down

specific purity criteria on food additives other than colours and sweeteners <sup>(5)</sup>, as last amended by Directive 2001/30/EC <sup>(6)</sup>.
