Resolution No. 41 of the Minister of Agriculture, Forestry and Food Economy of 27 March 1986 (GMorg-0131-16/86) on granting of statutes to the Institute of Breeding and Acclimation of Plants.

In virtue of Art. 4 sec. 3 of the Law of 25 July 1985 on research and development establishments (publ. in the Journal of Laws No. 36 item 170) it is resolved as follows:

§ 1

The Institute of Breeding and Acclimation of Plants receives hereby statutes annexed to this Resolution.

§ 2

Forfeited is the Resolution No. 43 of the Minister of Agriculture of 23 May 1980 on the granting of statutes to the Institute of Breeding and Acclimation of Plants.

§ 3

This resolution is enacted on the date of signing:

(-), signature illegible, Dr Eng., Stanislaw Sliwinski, Under-Secretary of State.

Affixed an Official Seal of the Ministry of Agriculture, Forestry and Food Economy.

Annex to Resolution No. 41 of the Minister of Agriculture, Forestry and Food Economy of 27 March 1986.

STATUTES of the Institute of Breeding and Acclimation of Plants

§ 1

The Institute of Breeding and Acclimation of Plants, hereinafter called the "Institute", operates on the basis of:

1) Law of 25 July 1985 on research and development establishments (publ. in the Journal of Laws No. 36, item 170);
2) Resolution No. 33 of the Presidium of the Government of 24 January 1951 on reorganization of the agricultural science;
3) these statutes.

§ 2

The principal place of operation of the Institute is Radzikow in the Metropolitan Voivodship of Warsaw.
§ 3
1. The scope of operation of the Institute comprises carrying out of scientific research in the field of cultivated plants genetics, breeding of plants and seed production (in respect to agricultural plants excluding the potato) and implementation, popularization, standardization and unification works in this field.
2. The scope of operation and range of operation of the Institute includes, in particular:
   1) development of the theory and methodologies of scientific research in the fields of science comprising the operation of the institute;
   2) running of scientific research works in:
      a) genetic fundamentals for plant breeding;
      b) methodologies of plant breeding;
      c) biological characteristics of new varieties;
      d) methods of producing and preserving seeds;
      e) methods of evaluating sowing material;
      f) complex problems of breeding sugar beet and other root plants, oil plants and fodder plants;
      g) economics of plant breeding and seed production;
   3) maintaining a central collection of cultivated plants - the "Gene Banks";
   4) breeding new varieties of cultivated plants;
   5) methodic consulting in the field of evaluation of seed material by seed inspection offices;
   6) training and advancement of specialized staff in the fields of science being the scope of operation of the institute;
   7) dissemination of the results of research and cooperation in their implementation into practice;
   8) preparation and publication of works relating to the fields of science being the scope of operation of the institute;
   9) preparation of expert opinions, experimental works, technical works and other services relating to research or development in the fields of science being the scope of operation of the institute, ordered by other institutions;
   10) collection, processing and dissemination of scientific, engineering
and economic information in the fields of science being the scope of operation of the institute,
11) carrying out regular standardization work in the stated fields of science.

§ 4
1. The following bodies exist within the Institute:
1) Director;
2) Scientific council;
3) General assembly of employees;
4) Workers Council.
2. The Scientific council consists of 30 persons.
3. A council being a consulting and opinioning body to the Director operates within the Institute.

§ 5
The position of a Scientific Secretary is established within the Institute.

§ 6
The positions of contract professors and contract associate professors may be established within the Institute.

§ 7
The institute shall acquire a personality at law on entry into the register of scientific and development establishments.

§ 8
The Institute is supervised by the Minister of Agriculture, Forestry and Food Economy.
Translation from the Polish.
The Institute of Breeding and Acclimation of Plants.
Radzikow near Warsaw or 05-870 Blonie.
00-950 Warsaw, P.O. Box 1019.
7 April 1986
EXCERPT from the Resolution No. 33 of the Presidium of the Government
of 24 January 1951 on reorganization of agricultural science(Letter of
Presidium of the Government No. 59/51).

In connection with the necessity to reorganize agricultural science and
to establish specialized scientific-research institutes on the basis of the
existing State Scientific Institute of Farming, the purpose of which would
be to carry out research work in the individual branches of agriculture:

Chapter I Sec. 1a
It is resolved to establish the Institute of Breeding and Acclimation
of Plants and to accept the presented statutes.

Chapter II
The Institute of Breeding and Acclimation of Plants receives the breed­
ing stations and research establishments of the State Farms Organization.

Chapter III
The Presidium of the Government obliges the Minister of Farming and
Agricultural Reform, the Minister of Science and Universities and the
Minister of Finance to secure funds for:
1a) construction of the Institute Center
1b) widening and up-dating of technical equipment
2 ) allocation of a farm, not to hinder scientific research work due
to economic reasons
3 ) carrying out scientific research work in agriculture.

Chapter IV
Execution of this Resolution is vested with the Ministries mentioned in
Chapter III.

Signed by: (-), Jozef Cyrankiewicz, Chairman of the Council of Ministers.
For conformity with the original: (-), signature illegible, Jan Nykiel,
MA., Staff Manager. The Institute of Breeding and Acclimation of Plants
in Radzikow.
