PART 2 - Key Concepts

34. Dangerous goods

(1) Goods are dangerous goods if –
   (a) the goods are determined under regulation 25(1)(a) to be dangerous goods; or
   (b) the goods satisfy the dangerous goods classification criteria set out, or referred to, in Part 2 of the ADG Code.

(2) However, goods that satisfy the criteria set out, or referred to, in Part 2 of the ADG Code are not dangerous goods if the goods are –
   (a) determined under regulation 25(1)(a) not to be dangerous goods; or
   (b) described as not subject to the ADG Code in a special provision in Chapter 3.3 of the ADG Code that is applied to the goods by column 6 of the Dangerous Goods List.

35. Goods too dangerous to be transported

Dangerous goods are too dangerous to be transported if they are –
   (a) goods set out or described in Appendix A to the ADG Code; or
   (b) goods determined under regulation 25(2)(a) to be too dangerous to be transported; or
   (c) goods (other than goods mentioned in paragraph (a) or (b) ) that the Competent Authority considers are so sensitive or unstable that they cannot be safely transported even if the relevant requirements of these regulations and the ADG Code are complied with.

Note
Section 70 of the Act provides that a person must not consign for transport goods that these regulations identify as being too dangerous to be transported.

36. UN Classes, Divisions and Categories of dangerous goods

The UN Class, Division or Category of a particular dangerous good for the purposes of these regulations is –
   (a) if a determination is in effect under regulation 25(1)(b) that the good is of a particular UN Class, Division or Category, the UN Class, Division or Category specified in the determination; or
   (b) if no such determination is in effect, the UN Class, Division or Category determined for the good in accordance with the ADG Code.

Note 1
Under the UN classification system there are 9 classes of dangerous goods. Under that system some UN Classes are further divided into Divisions and some Divisions are divided into Categories.

Note 2
Under the ADG Code, if particular dangerous goods are listed in the Dangerous Goods List, their UN Class or Division is that listed in column 2 of that list opposite the name and description of those goods, unless Chapter 3.3 of the Code provides for those goods to be assigned to a different UN Class or Division. If applicable, Chapter 2 of the Code describes how the UN Category of dangerous goods is to be determined. Once again the Category may be changed under Chapter 3.3 of the Code.

37. Subsidiary risk

The subsidiary risk, if any, of a particular dangerous good for the purpose of these regulations is –
   (a) if a determination is in effect under regulation 25(1)(c) that the good has a particular subsidiary risk, the subsidiary risk specified in the determination; or
   (b) if there is no such determination, the subsidiary risk determined for the good in accordance with the ADG Code.
Dangerous goods that are able to be assigned to more than one UN Class or Division are assigned a subsidiary risk. This subsidiary risk is the other UN Class/es or Division/s to which the goods also belong. Under the ADG Code, if particular dangerous goods are listed in the Dangerous Goods List, their subsidiary risk is that listed in column 4 of that list opposite the name and description of those goods unless Chapter 3.3 of that Code provides for those goods to be assigned a different subsidiary risk.

38. Packing Groups

The Packing Group, if any, of a particular dangerous good for the purposes of these regulations is –

(b) if no such determination is in effect, the Packing Group determined for the good in accordance with the ADG Code.

Note

The assignment of particular dangerous goods to a Packing Group indicates the degree of danger of, and the level of containment required for, the goods. The Packing Group of a substance can be determined from the Dangerous Goods List, although in some cases it is also necessary to refer to Chapter 3.3 of the ADG Code.

39. Incompatibility

(1) Dangerous or other goods are incompatible with dangerous goods if –

(a) the goods are incompatible under Chapter 9.1 of the ADG Code; or

(b) the goods are determined under regulation 25(1)(e) to be incompatible with the dangerous goods; or

(2) Packaging or equipment for use in the transport of dangerous goods is incompatible with the goods if any component of the packaging or equipment that is intended or likely to come into contact with the goods during transport –

(a) is likely to interact with the goods and increase risk because of the interaction; and

(b) is not protected from contact under foreseeable circumstances by a protective coating or other effective means.
