CHAPTER 1. Short Title and Findings and Declarations [78500 - 78500.4]

78500.

This division shall be known and may be cited as the Safe, Clean, Reliable Water Supply Act.
(Added by Stats. 1996, Ch. 135, Sec. 1. Approved November 5, 1996, by adoption of Proposition 204.)

78500.2.

In placing this measure before the voters, the Legislature hereby finds and declares all of the following:
(a) The state faces a water crisis that threatens our economy and environment.
(b) The state’s growing population has increasing needs for safe water supplies which are essential to the public health, safety, and welfare.
(c) It is of paramount importance that the limited water resources of the state be protected from pollution, and conserved and recycled whenever economically, environmentally, and technically feasible.
(d) The state should plan to meet the water supply needs of all beneficial uses of water, including urban, agricultural, and environmental, utilizing a wide range of strategies including water conservation and recycling, conjunctive use of surface and groundwater supplies, water transfers, and improvements in the state’s water storage and delivery systems to meet the growing water needs of the state.
(e) This measure is a necessary first step toward providing for the state’s long-term water supply requirements through a number of water management strategies.
(f) The San Francisco Bay/Sacramento San Joaquin Delta Estuary (the Bay-Delta) is of statewide and national importance. The Bay-Delta provides habitat for more than 120 species of fish and wildlife and serves as a major link in our water delivery system for businesses and farms statewide and more than 22 million residents.
(g) The state has signed an historic accord with federal officials and statewide water interests that calls for the development of a comprehensive and long-term solution for the water supply reliability, water quality, and environmental problems of the Bay-Delta.
(h) Federal and state representatives have initiated a program known as CALFED, to develop a comprehensive and long-term solution to the problems
associated with the Bay-Delta, including an equitable allocation of program costs among beneficiary groups. The success of the CALFED program is vital to the environmental and economic well-being of the state.

(Added by Stats. 1996, Ch. 135, Sec. 1. Approved November 5, 1996, by adoption of Proposition 204.)

ARTICLE 3. Water Conservation and Groundwater Recharge [78670 - 78676]

( Article 3 added by Stats. 1996, Ch. 135, Sec. 1. )

78670.

Unless the context otherwise requires, the following definitions govern the construction of this article:
(a) (1) “Groundwater recharge facilities” means land and facilities for artificial groundwater recharge through methods which include, but are not limited to, percolation using basins, pits, ditches and furrows, modified streambed, flooding, and well injection and in-lieu recharge. “Groundwater recharge facilities” also means capital outlay expenditures to expand, renovate, or restructure land and
facilities already in use for the purpose of groundwater recharge and to acquire additional land for retention and detention basins.

(2) Groundwater recharge facilities may include any of the following:
(A) Instream facilities for regulation of water levels, but not regulation of streamflow to accomplish diversion from the waterway.
(B) Agency-owned facilities for extraction.
(C) Conveyance facilities to the recharge site, including devices for flow regulation and measurement of recharge waters.

(3) Any part or all of the project facilities, including the land under the facilities, may consist of the separable features, or an appropriate share of multipurpose features, of a larger system, or both.

(b) “In-lieu recharge” means accomplishing increased storage of groundwater by providing interruptible surface water to a user who relies on groundwater as a primary supply, to accomplish groundwater storage through the direct use of that surface water in lieu of pumping groundwater. In-lieu recharge is used instead of continuing pumping while artificially recharging with the interruptible surface waters. However, bond proceeds may not be used to purchase surface water for use in lieu of pumping groundwater.

(c) “Local agency” or “agency” means any city, county, district, joint powers authority, or other political subdivision of the state involved with water management.

(d) “Project” means both of the following:
(1) Groundwater recharge facilities.
(2) Voluntary, cost-effective capital outlay water conservation programs.

(e) “Subaccount” means the Water Conservation and Groundwater Recharge Subaccount created by Section 78671.

(f) (1) “Voluntary, cost-effective capital outlay water conservation programs” mean those feasible capital outlay measures to improve the efficiency of water use through programs, the benefits of which exceed their costs.
(2) (A) The programs include, but are not limited to, all of the following:
(i) The lining or piping of ditches.
(ii) Improvements in water distribution system controls such as automated canal control, construction of small reservoirs within distribution systems that conserve water that has already been captured for use, and related physical improvements.
(iii) Tailwater pumpback recovery systems.
(iv) Major improvements or replacements of distribution systems to reduce leakage.
(v) Capital changes in on-farm irrigation systems which improve irrigation efficiency such as sprinkler or subsurface drip.

(vii) Conveyance facilities in a county of the third class, including appurtenances, necessary to implement a long-term conservation program to transfer conserved water from areas not directly receiving water from the bay-delta to areas that receive water from the bay-delta and whose demands on the bay-delta would be reduced as a result of the transfer.

(B) In each case, the department shall determine if there is a net savings of water as a result of each proposed project and the project is cost-effective.

(Added by Stats. 1996, Ch. 135, Sec. 1. Approved November 5, 1996, by adoption of Proposition 204.)

78671.

(a) There is hereby created in the account the Water Conservation and Groundwater Recharge Subaccount. The sum of thirty million dollars ($30,000,000) is hereby transferred from the account to the subaccount.

(b) Notwithstanding Section 13340 of the Government Code, the sum of twenty-five million dollars ($25,000,000) is hereby continuously appropriated, without regard to fiscal years, to the department, for loans to local agencies to aid in the acquisition and construction of voluntary, cost-effective capital outlay water conservation programs and groundwater recharge facilities.

(Added by Stats. 1996, Ch. 135, Sec. 1. Approved November 5, 1996, by adoption of Proposition 204.)

78672.

Any loan contract entered into pursuant to this article may include provisions determined to be necessary by the department.

(Added by Stats. 1996, Ch. 135, Sec. 1. Approved November 5, 1996, by adoption of Proposition 204.)

78672.5.

(1) An estimate of the reasonable cost and benefit of the program.

(2) An agreement by the local agency to proceed expeditiously with, and complete, the program.

(3) A provision that there shall be no moratorium or deferment on payments of principal or interest.
(4) A loan period of not more than 20 years with an interest rate set at a rate equal to 50 percent of the interest rate paid by the state on the most recent sale of state general obligation bonds, to be computed according to the true interest cost method. If the interest rate so determined is not a multiple of one-tenth of 1 percent, the interest rate shall be set at the next higher multiple of one-tenth of 1 percent. The interest rate set for each contract shall be applied throughout the repayment period of the contract. There shall be a level annual repayment of principal and interest on the loans.
(5) A provision that the project shall not receive any more than five million dollars ($5,000,000) in loan proceeds from the department.
(b) The department shall give preference for loans under this section on the basis of the cost-effectiveness of the proposed project, with the most cost-effective projects receiving the highest preference.

(2) An estimate of the reasonable cost and benefit of the project, including a feasibility report which shall set forth the economic justification and the engineering, hydrogeologic, and financial feasibility of the project, and shall include explanations of the proposed facilities and their relation to other water-related facilities in the basin or region.
(3) An agreement by the agency to proceed expeditiously to complete the project in conformance with the approved plans and specifications and the feasibility report and to operate and maintain the project properly upon completion throughout the repayment period.
(4) A provision that there shall be no moratorium or deferment on payment of principal or interest.
(5) A loan period of not more than 20 years with an interest rate set at a rate equal to 50 percent of the interest rate paid by the state on the most recent sale of state general obligation bonds, to be computed according to the true interest cost method. If the interest rate so determined is not a multiple of one-tenth of 1 percent, the interest rate shall be set at the next higher multiple of one-tenth of 1 percent. The interest rate set for each contract shall be applied throughout the repayment period of the contract. There shall be a level annual repayment of principal and interest on the loans.
(6) A provision that the project shall not receive more than five million dollars ($5,000,000) in loan proceeds from the department.

(b) The department shall give preference under this section to projects for groundwater recharge that are located in overdrafted groundwater basins and those projects of critical need, to projects whose feasibility studies show the greatest economic justification and the greatest engineering and hydrogeologic feasibility as determined by the department, and to projects located in areas which have existing water management programs.

A loan for a feasibility study shall not decrease the maximum amount of any other loan which may be made under this article.

(Added by Stats. 1996, Ch. 135, Sec. 1. Approved November 5, 1996, by adoption of Proposition 204.)

78675.

(Repealed and added by Stats. 1999, Ch. 725, Sec. 10. Approved March 7, 2000, by adoption of Proposition 13.)

78675.5.

Notwithstanding Section 13340 of the Government Code, the sum of five million dollars ($5,000,000) in the subaccount is hereby continuously appropriated, without regard to fiscal years, to the department for a grant to a local agency for the development of supplemental water sources, distribution systems, and
