**Method of determining the volume of fish**

**Part 2**

The volume of space which is filled by whole, undamaged fish without compressing those fish.

**Part 3** — Method of determining the length of fish trunks and fillets

A fish trunk or fillet is to be measured —

(a) when the fish is lying flat; and

(b) without being held; and

(c) lengthwise along the longest part of the fish to which both the skin and the flesh of the fish extends; and

(d) in the case of a fillet, the measurement is not to include any part of the head or tail of the fish still attached.
