SECTIONS 35 AND 84 PLANT VARIETY AND SEEDS REGULATIONS

Statutory Instrument
67 of 1988
157 of 1989
Act No.
13 of 1994
21 of 1995
Title

1. These Regulations may be cited as the Plant Variety and Seeds Regulations.

Interpretation

2. In these Regulations unless the context otherwise requires-

"Certifying Authority" means the authority established by section three of the Act;

"control growing" means the growing of plants under tests to determine the cultivar purity and disease infection;

"cultivar" means a subdivision of any species of seed which can be distinguished from other subdivisions of that species by means of growth, plant, fruit or other characteristics;

"field inspection" means an inspection of a seed field and includes the checking of isolation, hectarage, off-types and weeding usually as part of a seed certification programme;

"germination capacity" means the percentage by number of seeds which, in the course of a germination test, have produced normal seedlings;

"isolation" means the required distance between two crops of the same species or between two crops of too closely related species to prevent contamination either mechanically or by pollination;

"I.S.T.A.' means the International Seed Testing Association;

"noxious weed" means weed species declared noxious by the Noxious Weeds Act; Cap. 231

"off-type plant" means a plant which does not exhibit the recognised and accepted habits and characteristics of the cultivar being grown;

"purity" means the percentage by weight of pure seed as determined by purity analysis;

"seed certification" means a system for quality control of seed multiplication and production;

"seed class" means a stage in a seed multiplication system well defined in respect of parent seed, standard of cultivation and seed quality;

"seed lot" means a specified quantity of seed, which is homogeneous and physically identifiable;

"S.C.C.I." means the Seed Control and Certification Institute of Zambia;

"variety" means cultivar;

"weed plant" is any plant which is not of the same species as the crop being grown, and which is generally considered as a weed.

Prescribed seeds

3. The seeds set out in the First Schedule shall be prescribed seed for the purposes of the Act.
The Seed Control and Certification Institute of Zambia

4. The Seed Control and Certification Institute of Zambia established under section seventeen is an official seed-testing station.

Sale of Seed

5. (1) No seed shall be offered for sale unless it has been certified or it has had its quality declared under regulation 7.

(2) No species of seed set out in the Second Schedule shall be offered for sale unless it has been certified.

Certification of seed

6. (1) No seed shall be certified unless it has been produced inspected, sampled, tested and complies with the standards set out in the Fourth Schedule.

(2) Seed shall be certified in six classes as set out in the Third Schedule:

Provided that a seed lot may be down-graded on the request of the applicant.

(3) Only cultivars which have been approved by the Certifying Authority shall be eligible for certification.

(4) Any crop which contains noxious weeds or noxious ergots shall not be eligible for certification.

(5) Breeders shall maintain the standards of cultivars approved under sub-regulation (3).

Declaration of seed quality

7. Seeds whose quality conforms to the standards set out in the Fifth Schedule shall have its quality declared as such.

Registration as seed grower

8. (1) An application for registration as a seed grower shall be made in Form I as set out in the Seventh Schedule.

(2) Each application shall be accompanied by the appropriate fee and shall refer to the growing of one crop only.

(3) An application shall not be approved in respect of land on which during the preceding season other cultivars of the same crop or other too closely related crops have been grown.

(4) On registration as a registered seed grower, the Certifying Authority shall furnish to the applicant a certificate of registration in Form 2 set out in the Seventh Schedule, which certificate shall specify the conditions with regard to the growing of the registered seed crop.

(5) Unless the Certifying Authority decides otherwise, only one cultivar of the same species shall be permitted on the same farm.

(6) The registered seed crop shall not exceed the approved hectarage by more than ten per cent, any excess over this amount shall be destroyed without compensation, immediately on the request of an authorised seed inspector.
(7) The Certifying Authority shall keep a register of registered seed growers.

(8) The grower shall plant the appropriate parent seed for the production of his registered seed class and shall keep a record of such parentage including certification labels and invoices as may be sufficient to satisfy the Certifying Authority in this respect.

Field inspection

9. (1) Field inspection for the purpose of certification shall be conducted by persons authorised by the Certifying Authority to be seed inspectors.

(2) A seed inspector conducting a field inspection shall refuse to certify a crop if he is satisfied that-

(a) the crop is so heavily contaminated with weeds, other species or disease as to render the crop unfit for seed or make inspection impracticable; or

(b) the isolation distance or the standards relating to off-types and other cultivars, prescribed in the Fourth Schedule have not been complied with; or

(c) for hybrids of maize, sorghum and sunflower there are more than three pollinating females per thousand plants;

(d) the crop exceeds the approved and registered hectarage by more than ten per cent.

(3) For the purpose of certification an inspector shall conduct at least three field inspections per crop.

(4) A report of every field inspection shall be made by a seed inspector in Form 3 set out in the Seventh Schedule, and shall be countersigned by the registered grower or his representative.

Licence for seed processing

10. (1) No person shall process seeds without a licence to process seed in Form 5 of the Seventh Schedule issued by the Certifying Authority.

(2) An application for a licence to process seed shall be made in Form 4 of the Seventh Schedule and shall be accompanied by the appropriate fee.

(3) The Certifying Authority shall issue a licence to process seed if he is satisfied that the applicant has the ability and the appropriate processing facilities to produce quality seed.

(4) A licence to process seed shall-

(a) set out the conditions relating to the processing of seed;

(b) be valid for thirty-six months.

(5) The Certifying Authority shall maintain a register of holders of licences to process seed.

(6) The Certifying Authority may enter and inspect any processing premises.

Seed seller's licence

11. (1) No person shall sell seeds without a seed seller's licence issued by the Certifying Authority in Form 7 set out in the Seventh Schedule.
(2) An application for a seed seller's licence shall be made in Form 6 set out in the Seventh Schedule and shall be accompanied by the appropriate fee.

(3) The Certifying Authority shall issue a seed seller's licence if he is satisfied that the applicant has the ability, knowledge and appropriate facilities to maintain the quality and viability of the seeds to be exposed for sale.

(4) A seed seller's licence shall-

(a) set out the conditions relating to the maintenance of the seeds to be exposed for sale;

(a) be valid for thirty-six months; the Certifying Authority may, however, limit the validity of such licence for any period less than thirty-six months but not less than six months, if it thinks it necessary.

(5) The Certifying Authority shall maintain a register of holders of seed sellers licence.

(6) The Certifying Authority may enter and inspect any premises where seeds are kept for sale.

Sampling of seeds

12. (1) The sampling of seed lots shall be conducted in accordance with current I.S.T.A. rules.

(2) Crops from different fields of the same origin, species and cultivar which have passed field inspections may be blended and bulked to constitute one seed lot.

(3) The applicant shall provide reliable scales for checking the weight of a seed lot.

(4) The seeds inspector or authorised officer who conducts the sampling shall submit a report of his sampling in Form 8 set out in the Seventh Schedule which report shall be counter-signed by the applicant or his representative.

(5) A seed lot which has been sampled in accordance with this regulation may be moved from one place to another.

Testing of seed

13. The official seed testers shall-

(a) test seeds in accordance with I.S.T.A. rules for seed testing on payment of the appropriate fee by the applicant;

(b) record the results of the seed test on a certificate in Form 9 set out in the Seventh Schedule;

(c) state in the certificate whether the seeds are marketable and the category of the seeds.

14. (1) Seed lots which have been sampled and tested under these Regulations shall be control growed in accordance with instructions issued by the S.C.C.I. Control growing

(2) The S.C.C.I. shall submit a report on each control growing carried out under these Regulations in Form 10 set out in the Seventh Schedule.

Packing and labelling of seeds

15. (1) Certified seed lots shall be packed in bags, securely closed, sealed by a seed inspector and labelled with a certification label.

(2) The certification label referred to in sub-regulation (1) shall state-

(a) the seed class;
(b) certification number;
(c) the species and cultivar of seed;
(d) lot number;
(e) purity (% by weight);
(f) germination capacity (% by number);
(g) expiry date; and
(h) warning text in case the seed lot is treated.

(3) The inspector who sealed the bags shall submit a report of the sealing in Form 11 set out in the Seventh Schedule.

(4) Where certified seed lots have to be re-packed, the repacking shall be done only with the approval of the S.C.C.I. and under S.C.C.I.’s supervision.

(5) The seller of seed whose quality has been declared under these Regulations shall label each package of seed being offered for sale and such label shall state the species, cultivar, purity (percentage by weight), germination capacity (percentage by number) and period of validity of the declaration.

Validity of certification and quality declaration

16. (1) Unless cancelled earlier, the validity of a certification-

(a) for cereals, pulses, oil crops, fibre crops and root crops shall be nine months;
(b) for herbage grasses and legumes, vegetables and stimulant crops, shall be twelve months;
from the date of completion of testing the seeds.

(2) Unless cancelled earlier, a declaration of quality for all kinds of species of seed shall be valid for twelve months from the date of completion of testing the seeds.

Importation of seed

17. (1) No person shall import seeds for sale-

(a) without a valid seed seller's licence;
(b) a notice to import the seeds has been submitted in Form 12 set out in the Seventh Schedule and has been approved by the Certifying Authority;
(c) if the seeds do not comply with the minimum standards set out in the Fifth Schedule.
(2) A notice to import seed shall refer to one specific quantity of seed of a given species and cultivar.
(3) The importer of seed shall on request supply S.C.C.I. with samples of the imported seed for checking its quality.
(4) The Certifying Authority may-
(a) regulate the certification of imported seed lots according to the certification scheme of Zambia;

(b) restrict the importation of any species and cultivar of seeds.

Appeals

18. Any person aggrieved by any decision made under these Regulations by-
(a) an inspector or duly authorised officer may appeal to the Certifying Authority;
(b) the Certifying Authority may appeal to the Minister.

Fees

19. The fees prescribed in the Sixth Schedule shall be payable in respect of the matters set out therein.

**FIRST SCHEDULE**

(Regulation 3)

PRESCRIBED SEEDS

CEREALS:
- Barley Hordeum vulgare L.
- Finger millet Eleusine coracana (L.) Gaertn.
- Maize Zea mays. L.
- Oats Avena sativa L.
- Pearl millet Pennisetum glaucum (L.) R.Br.
- Rice Oryza sativa L.
- Rye Secale cereale L.
- Sorghum Sorghum bicolor (L.) Moench
- Triticale X Triticosecale Wittm.
- Wheat Triticum spp.

PULSES:
- Beans Phaseolus vulgaris L.
- Broad bean Vicia faba L.
- Chick pea Cicer arietinum L.
- Cowpea Vigna unguiculata (L.) Walp.
- Dolichos bean Dolichos lablab L.
- Pea Pisum sativum L.
- Soya bean Glycine max (L.) Merr.
- Velvet bean Mucuna deeringiana (Bort) Merr
- Common vetch Vicia sativa L.

OIL CROPS:
- Castor bean Ricinus communis L.
- Ground-nut Arachis hypogaea L.
- Linseed Linum usitatissimum L.
- Oilseed rape Brassica napus L. var. oleifera Metzg.
- Safflower Carthamus tinctorius L.
- Sesame Sesamum indicum L.
- Sunflower Helianthus annuus L.

FIBRE CROPS:
- Cotton Gossypium spp.
- Flax Linum usitatissimum L.
Kenaf Hibiscus cannabinus L.
ROOT CROPS:
Beet Beta vulgaris L.
Swede Brassica napus L. var. napobrassica (L.) Reichb
Turnip Brassica rapa L. var. rapifera Metzg.
HERBAGE GRASSES:
Buffel grass Cenchrus ciliaris L.
Guinea grass Panicum maximum Jacq.
Paspalum grass Paspalum spp.
Rhodes grass Chloris gayana Kunth
Rye grass Lolium spp.
Setaria grass Setaria sphacelata (Schum.) Stapf et C. E. Hubb.
Weeping lovegrass Eragrostis curvula (Schrader) Nees
HERBAGE LEGUMES:
Centro Centrosema pubescens Benth..
Clover Trifolium spp.
Glycine Glycine javanica L.
Greenleaf Desmodium intortum (Miller) Urban.
Leucaena Leucaena leucocephala (Lam.) de Wit.
Lucerne Medicago sativa L.
Silverleaf Desmodium uncinatum (Jacq.) DC
Siratro Macroptilium atropurpureum (DC)
Urban.
Stylo Stylosanthes guianensis (Au bl.) Sw.
Sunnhemp Crotalaria juncea L.
VEGETABLES:
Amaranth Amaranthus spp.
Beet Beta vulgaris L.
Brussels sprouts Brassica oleracea L. convar. oleracea var. gemmifera DC.
Beans Phaseolus vulgaris L.
Cabbage Brassica oleracea L. var. capitata L.
Carrot Daucus carota L.
Cauliflower Brassica oleracea L. convar botrytis (L) Alef. var. botrytis
Celery Apium graveolens L.
Chinese cabbage Brassica chinensis L.
Cucumber Cucumis sativus L.
Dill Anethum graveolens L.
Eggplant Solanum melongena L.
Endive Cichorium endivia L.
Kale Brassica oleracea L. var. acephala DC.
Leek Allium porrum L.
Lettuce Lactuca sativa L.
Muskmelon Cucumis melo L.
Okra Hibiscus esculentus L.
Onion Allium cepa L.
Parsley Petroselinum crispum (Miller) Nyman ex A. W. Hill.
Parsnip Pastinaca sativa L.
Pea Pisum sativum L. sensu lato.
Pepper Capsicum spp.
Pumpkin Cucurbita pepo L.
Radish Raphanus sativus L. var. radicula Pers.
Rape Brassica napus L.
Spinach Spinacea oleracea L.
Sprouting broccoli Brassica oleracea L. convar botrytis (L.) Alef var. cymosa Duch.
Squash Cucurbita moschata (Duch) Duch ex. Poir.
Tomato Lycopersicon esculentum P. Mill.
Turnip Brassica rapa L. var. rapifera Metzg.
Water melon Citrullus lanatus (Thumb.) Matsum et Nahai

STIMULANT CROPS:
Tobacco Nicotiana tobacum L.

SECOND SCHEDULE

(Regulation 5)

SEED FOR COMPULSORY CERTIFICATION

SPECIES:
CEREALS:
Maize
Sorghum
Wheat
PULSES:
Soyabean
OIL CROPS:
Sunflower

THIRD SCHEDULE

(Regulation 6 (2))

SEED CERTIFICATION SCHEME

Colour of
Code Class Parent seed label
A Pre-basic Seed Produced from the breeder's Violet stripe
parent material under control on white
of the breeder and supervision of the
S.C.C.I. More than one generation m
may be allowed by the
Controller of Seeds

B Basic Seed Produced from pre-basic seed and White
officially inspected
Only one generation permitted

C1 Certified Seed, Produced from basic seed and Blue stripe
1st generation inspected on white officially
C2 Certified Seed, Produced from certified seed, 1st Red stripe on
2nd generation generation (or higher class) and white offically inspected

C3 Certified Seed, Produced from certified seed, 2nd Red stripe
3rd generation generation (or higher class) and on white
officially inspected

D Certified Seed, Produced from certified seed, 3rd Green stripe
4th generation generation (or higher class) and on white
officially inspected

E Emergency class Only used when a serious shortage Red label
of seed (for certification) of
essential crops occurs.
The standards will be
set by the Controller of Seeds

**FOURTH SCHEDULE**

(Regulation 6 (1))

**STANDARDS FOR ZAMBIA CERTIFIED SEED**

NOTES:
Even though the minimum requirements for certification have been fulfilled the certification of a seed lot shall be refused or permitted in a lower class if:
(a) the seed to a great extent (more than 15%) is mixed with ergots or infected with seed-borne diseases and insects;
(b) because of mould or musty smell the seed cannot be considered to stand storage without loss in germination capacity;
(c) after considering the cultivar and the year's crop growth the seed is of unsatisfactory quality with regard to cleaning, scarifying or grading.
